

Customer information regarding our Products made from bovine tissue

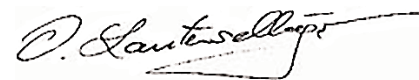

Roth' Albumins, enzymes, and bovine microbiological basic compounds are derived from cattle originated in countries free of foot-and-mouth disease. All animals are observed, examined and approved by certified veterinarians prior to slaughtering. Handling of the reagents bears no risk of spongiform encephalopathy (BSE/TSE) or foot-and-mouth disease for user or environment.

This information is valid for the following products:

Product	Order No.
Albumin, raw	5214
Albumin, nuklease free	8895
Albumin, Fraction V	8076
Albumin, biotin free	0163
Albumin, protease free	T844
Albumin, fatty acid free	0052
Albumin, endotoxin tested	CP84
Albumin, low endotoxin	CP77
Casein	8569
Casein hydrolysate, high AN/TN ratio	A157
Casein hydrolysate, standard AN/TN ratio	AE41
Chymotrypsin	0238
DNase II	6648
Meat extract, paste	5770
Meat extract, powder	X975
Powdered milk	T145
NZamine	CP76
Peptone from Casein	8986
Proteose peptone	HP32
RNase A	7156
RNase A	7164
Tryptone/Peptone	8952
